1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

Page 2

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public
use or on sale in this country, more than one year prior to the date of application for patent in the United
States.

3. Claims 1-3, 8-10,15 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Fedder et al.

The disclosure of Fedder provides a complete response to each and every element set forth in the claims. For example, figs.1-5 show an insulative housing 10, a top surface contact terminals 30, a metal latch 80 including a first leg 82 and a second leg 86, the first and second legs formed of a substantially V-shaped means 90 for connecting the latch to a V-shaped mating connector 152, the means is located between first and second ends of the second leg 86.

As to claim 2, the connecting means comprises at least one protrusion 90 which extends from the second leg 86.

As to claim 3, the protrusion 90 extends in a direction opposite to the first leg 82.

As to claim 8, the connecting means comprises first and second spaced apart protrusions 90 and extending from the second leg 86.

As to claims 9, 10 the protrusions extending in a direction opposite the first leg.

As to claim 15, one side wall 63 of the housing is read as the recited top surface and the first leg is substantially parallel to the substantially planar top surface.

As to claim 18, the metal latch is formed from stainless steel.

As to claim 19, the protrusion is generally perpendicular to the second leg.

As to claim 20, the protrusion extends away form the first leg.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 4-7, 11-14, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fedder et al in view of Hirai and Lin.

As to claims 4, 6, 11, 13, Fedder does not show the second leg with a second portion to be at a predetermined angle which is greater than the predetermined angle of the first portion and the third portion being substantially parallel to the first leg. Hirai, fig. 1 shows a second leg 6 comprising a second portion (not labeled) being at a predetermined angle which is greater than the predetermined angle of a first portion and a third portion being substantially parallel to a first leg. It would have been obvious to one with skill in the art to modify the connector of Fedder by forming the second leg with the features as described as above, as taught by Hirai, in order to provide better latch for the connector.

As to claims 5, 7, 12, 14, at least one protrusion or protrusions 90 is provided on the first potion as shown in fig. 2 of Fedder.

As to claims 16 and 17, Fedder does not show the first leg having barb means provided on the first leg which engage with walls. Lin, fig. 4 shows a first leg having barb means 121 which engage with walls of the housing (22, 21a). It would have been

obvious to one with skill in the art to modify the connector of Fedder by forming the first

leg with features as described above, as taught by Lin, in order to secure the latch to

the housing.

6. Applicant's arguments with respect to claims 1-20 have been considered but are

moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in

this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.
